75 GREAT FALLS STUDENTS
VISIT UNIVERSITY, HOERNER WALDORF

MISSOULA--

About 75 students from the Great Falls High School social ecology class visited several classes at the University of Montana and toured the Hoerner Waldorf plant west of Missoula on Wednesday (May 23).

Mrs. Deanna W. Sheriff, assistant for alumni relations in the UM Alumni Association Office, said the students visited a laboratory operated by Dr. Clancy Gordon, professor of botany and coordinator of the UM Environmental Studies Program, where Gordon demonstrated floride experiments originating in Glacier Park for the high school students.

Sheriff said Dr. Richard E. Shannon, professor of forestry at UM, discussed "Economics and the Environment" while the students ate sack lunches provided by the Alumni Association Wednesday on the lawn near the UM tennis courts.

Accompanying the students during the trip was Bill Thomas, a UM alumnus, who is instructor in the high school social ecology class.

The visit to Missoula by the Great Falls students was under the auspices of the UM Alumni Association.
